Objective:

Aspiring Full-Stack Web Developer with a strong foundation in computer science and hands-on experience in **MERN stack** and **frontend development**. Passionate about crafting responsive, user-friendly web interfaces and continuously improving through real-world projects. Seeking an opportunity to grow in a collaborative tech environment where I can apply my skills, enhance my confidence, and contribute meaningfully to the team's success.

Projects

Learning Management System (LMS)
- Created a full-stack LMS using **MERN stack** (**MongoDB, Express.js, React.js, Node.js**)
- Implemented features like **user authentication**, **course enrollment**, **dynamic ratings**, and **responsive dashboard**
- Designed a clean, intuitive UI for both learners and instructors
- Enabled **real-time interaction** and **efficient content management** for a seamless learning experience

AI-Powered Code Reviewer
- Built an **AI-Powered Code Reviewer** using the **MERN Stack** and integrated **Gemini AI** for intelligent code analysis.
- Enabled real-time syntax highlighting, **review suggestions**, and **code improvement feedback** for JavaScript.
- Improved developer efficiency by automating code reviews and promoting clean, optimized code practices.

Hand Gesture Recognition System
- Developed a **real-time finger-counting system** using **Python, OpenCV, MediaPipe, and NumPy**
- Enabled **hands-free interaction** through gesture recognition with webcam input
- Achieved accurate detection with minimal latency using efficient image processing

Personal Portfolio Website
- Built a responsive personal website using **HTML, TailwindCSS, JavaScript, and React**
- Implemented a **clean, fast-loading layout** with smooth transitions and hover effects
- Optimized images and structure for **performance and SEO visibility**

Certificates
